# Contents

## CHAPTER 1

Introduction 1  
1.1 Background and Motivation 1  
1.2 Typical System Architecture 3  
1.3 Intended Readership for This Book 4  
Reference 5  

## CHAPTER 2

Wireless Devices and Sensor Networks 7  
2.1 Introduction 7  
2.2 Energy Requirements of Autonomous Devices 9  
2.2.1 From Mobile Phones to MP3 Players 9  
2.2.2 Radio Frequency Identification (RFID) 10  
2.2.3 Wireless Sensor Networks 12  
2.3 Enabling Technologies: Devices and Peripherals 19  
2.3.1 Low-Power Microcontrollers and Transceivers 19  
2.3.2 Sensors, Peripherals, and Interfaces 20  
2.4 Wireless Communication 24  
2.4.1 Communication Protocols and Power Requirements 24  
2.4.2 Energy-Aware Communication Protocols 27  
2.5 Energy-Awareness in Embedded Software 33  
2.5.1 Operating Systems and Software Architectures 33  
2.6 Alternative Nonrenewable Power Sources 35  
2.6.1 Direct Transmission 35  
2.7 Discussion 36  
References 37  

## CHAPTER 3

Photovoltaic Energy Harvesting 45  
3.1 Introduction 45  
3.2 Background 46  
3.2.1 Semiconductor Basics 46  
3.3 Solar Cell Characteristics 49
4.6 Rotary Generators 116
4.7 Example Devices 117
  4.7.1 Human-Powered Harvesters 117
  4.7.2 Conventional Generators for Industrial and Transport Applications 119
  4.7.3 Microscale Generators 123
  4.7.4 Tuneable Generators 126
4.8 Conclusions and Future Possibilities 128
  4.8.1 Piezoelectric Generators 129
  4.8.2 Electromagnetic Generators 129
  4.8.3 Electrostatic Generators 130
  4.8.4 Summary 130
Acknowledgments 131
References 131

CHAPTER 5
Thermoelectric Energy Harvesting 135
5.1 Introduction 135
5.2 Principles of Thermoelectric Devices 135
  5.2.1 Thermoelectric Effects 136
  5.2.2 Thermoelectric Devices 139
5.3 Influence of Materials, Contacts, and Geometry 142
  5.3.1 Selection of Thermoelectric Materials 142
  5.3.2 Thermal and Electrical Contacts 144
  5.3.3 Geometry Optimization 146
  5.3.4 Heat Exchangers 148
5.4 Existing and Future Capabilities 148
  5.4.1 Low Power Systems 149
  5.4.2 Waste Heat Recovery 151
  5.4.3 Symbiotic Cogeneration System 153
  5.4.4 Commercial Thermoelectric Module Suppliers 154
5.5 Summary 155
References 155

CHAPTER 6
Power Management Electronics 159
6.1 Introduction 159
  6.1.1 Interface Circuit Impedance Matching 159
  6.1.2 Energy Storage 161
  6.1.3 Output Voltage Regulation 161
  6.1.4 Overview 162
6.2 Interface Electronics for Kinetic Energy Harvesters 162
  6.2.1 Electromagnetic Harvesters 164
  6.2.2 Example of a Complete Power Electronics System for a Continually Rotating Energy Harvester 166
  6.2.3 Piezoelectric Harvesters 182
6.2.4 Electrostatic Harvesters 188

6.3 Interface Circuits for Thermal and Solar Harvesters 197
   6.3.1 Thermal 197
   6.3.2 Power Electronics for Photovoltaics 201

6.4 Energy Storage Interfaces 204
   6.4.1 Output Voltage Regulation 205

6.5 Future Outlook 206

6.6 Conclusions 207

References 207

CHAPTER 7

Energy Storage 211

7.1 Introduction 211
   7.1.1 Battery Operating Principles 212
   7.1.2 Electrochemical Capacitor Operating Principles 213
   7.1.3 Comparison of Energy Storage Devices 214

7.2 Micropower Supply for Wireless Sensor Devices 215
   7.2.1 Microenergy Storage Considerations 216
   7.2.2 Materials Considerations for Microbatteries 217
   7.2.3 Geometry and Processing Considerations for Microbatteries 219

7.3 Implementations of 2D Microbatteries 219
   7.3.1 Thin Film Solid-State Microbatteries 220
   7.3.2 Thick Film Microbatteries 222
   7.3.3 Concluding Remarks for 2D Microbatteries 229

7.4 Three-Dimensional Microbatteries 230
   7.4.1 3D Microbattery Architectures with a Discontinuous Element 232
   7.4.2 3D Microbattery Architectures with Continuous Elements 237
   7.4.3 Prospects for Three-Dimensional Microbattery Implementation 240

7.5 Electrochemical Microcapacitors 242
   7.5.1 Electrochemical Capacitor Materials 242
   7.5.2 Microcapacitor Prototypes 243
   7.5.3 Conclusions and Prospects for Microcapacitors 246

7.6 Conclusion 247

References 247

CHAPTER 8

Case Study: Adaptive Energy-Aware Sensor Networks 253

8.1 Introduction 253
8.2 Requirements 254

8.3 Energy Harvesting Sensor Node Hardware Design 254
   8.3.1 Node Core Design 254
   8.3.2 Overview of Modular Design 255
   8.3.3 Choice of Microprocessor 255
   8.3.4 Energy Multiplexer Subsystem 256
   8.3.5 Supercapacitor Energy Storage Module 257
   8.3.6 Solar Energy-Harvesting Module 258
